

*To whose temple the Arch is starlit,
In whose temple the Sun is the image of gold,
To whose temple the Moon goes every month
And brings the message out every full-moon,
And whose message the Moon sings as a word of sixteen letters,
His religion I belong to, His temple I visit,
His name I utter, His glory I live in.
To Him I offer the lotus of my day,
To Him I offer the lotus of my night.*

These seed thoughts from the Spiritual Psychology meditations of Dr. Ekkirala Krishnamacharya give the note for the Lunar Messenger of the Circle of Good Will. The moon is the reflective principle and symbol of the mind. When pure and calm, it reflects impressions from higher circles. Especially the time of the full moon is conducive for higher alignment, if we are poised enough. The alignment of the sun, moon and earth in the sky helps experiencing the magic of the light of the soul and its manifestation down to the physical.

The Lunar Messenger is published every month in time for the full moon. It contains thoughts from the teachings of eternal wisdom. Its purpose is to inspire us to put them into practical life.

AQUARIAN WIND 10: Electricity

The Current and the Devices

In our home we receive electricity through the line system of the wires. When the main switch is on, the current spreads and the connected electrical devices function. When the switch is off, all devices are dead and the bulb also doesn't shine anymore.

Only the presence of the current makes the devices work. The light in the bulb indicates that there is electricity. We cannot see electricity itself; however, we can realise its presence through its effect. What happens with the light when we press the circuit breaker? It doesn't stop existing, but goes back to its source. The light gets, so to speak, absorbed into electricity and continues to exist in potential form. As soon as we break the power circuit the electric current disappears. It escapes into space like water escapes through drainage into a river or the ocean. Space is an ocean of electricity, but we cannot perceive it. As soon as we close the circuit the electricity is drawn again into the circuit, and the bulb shows through its shine that the current is back again.

Pure water is drawn into a pipeline for our drinking and washing purposes; the same happens with the current. Water is the physical form of electricity, the basis of every movement of vital force. Creation is an expression of the waters of space, of ether. And just as water is distilled by Nature in the form of clouds, electricity is purified as life in space. We call it vital force. The electro-magnetic field around the earth forms the vital plane which Master CVV calls "*plenty of prana*". The life of the planet is worked out in it. All living beings born on the planet

carry this life as their individual electro-magnetic field.

States of Electricity

Pure existence is the background of all created things. It cannot be defined, it can only be experienced. And thus electricity exists, though we cannot see it. The cosmic or electrical fire, which is beyond forms and colours and which cannot be described expresses itself as solar fire and as fire by friction. These three fires are "flames", states of existence: pure existence, material existence, the existence between them, where matter and spirit can be experienced. When we take electricity as spirit, the solar fire is the flame of the soul, and the fire by friction the body. In fact, there is no separation of spirit and matter except for the limited purpose of our understanding. It is the mind which divides.

Matter with all its differentiations is but a range of equilibriums among the states of the same electricity. The nuclear activity of atoms, the biological activity of cells and the chemical reactions of molecules are all states of electricity. Heat, light and magnetic currents are but various states of electricity which are not yet fully known to the modern concept of electricity. It will be proved in the future that what we call life, mind, mood, concept, emotion, etc. are all manifestations of the same electricity that exists in the space around the earth.

Be it bone or be it brain cell, fundamentally it is the one essence. The brain cell is electrical and fiery, while in the bone the fire is more hidden and less active. The lesser the degree of fire, the grosser is the form; the greater its degree, the subtler is the

form. The bones are solid and dense physical, the eye is more permeable. The brain cells are filled with electricity. Compared with the other body cells they are fine, but they are nevertheless very dense. As long as we are overly busy with worldly things the brain also gets more and more dense and impermeable.

The Flash of Intuition

In order to make the brain more receptive and to transform the cells, rules and exercises have been given. By working with colours, light and sound we engage the brain with subtle matters. The most profound transformations happen in silence. By invoking the Master energies are being transmitted and impurities removed from our system. An electric signal flashes through us and intuition happens in a fraction of a second. We know that something is true, but we don't understand the logic behind. For a good reception of impulses through the brain cells Master EK recommended to eat ghee - clarified butter. Thus the brain works better, we develop a greater openness and the occult understanding unfolds.

The Main Switch

The head belongs to electric fire; there the highest enlightenment can happen. As soon as our heads are enlightened and tuned up to the divine Plan, the entire system is enlightened. The energies enter through the upper dome of the head. The head centre is the most electric point; its most externalised point is the Ajna centre. It shows as a point of light through which the light enters into us. In its vicinity is the pituitary. When it gets stimulated by the electric impulse, the light propagates through the nervous system. Thus, the pituitary is the main switch; as soon as it is linked to the surrounding current the entire system receives electricity and can function. Therefore, the Indian seers strongly recommend meditating in the brow centre; they don't consider it to be so important to work with the other centres to invoke the Light into us.

The Hair

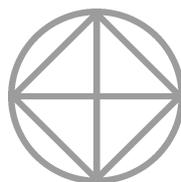

Well-combed hair facilitates well-ordered flowing through of electric currents; the hair itself is indeed

electric. In earlier times the knowers wore their hair arranged with a middle parting and well-combed, so that the divine structures can manifest through them. They parted their hair into two equal parts, and from the point of the medulla in the neck they interlaced it seven times, since the head is the consciousness pole which connects with the seven planes of creation. Native Americans in North and Central America and also the Indians - men as well as women - have kept their hair accordingly. It should also not be kept dry. Natural oils work against a loss of electric energy. The hair guides the thoughts from the surroundings into us. Cutting the hair provides freshness. Some people have a tonsure when they want to receive new thought forms and to start a new project with a new and fresh approach.

Connecting with the Current

The present Aquarian age is also called the age of electricity; before this time cycle mankind did not know electricity. We now can understand the essence of electricity better and better, because our bodies become more and more electric. The bodies of people born after 1945 are finer than earlier bodies, and since then the bodies have become more and more subtle and electric. The comprehension of many children is far superior to that of the elder ones. Their perceptions are much better, faster and deeper. The energies of synthesis permeating the planet are like an increase of the electric current. They flow from the one source, which is also called THE MASTER. All Masters are transmitter of this electric energy. By invoking it and connecting ourselves with it our voltage gets increased. Within a short span of time we can feel a feeble electric current in the body. It charges the vital body and removes blockages in the etheric matter. It is the energy of the one Master working through the many souls, as there is only one electricity illumining the many bulbs. This electricity strengthens the current in us and leads us to fulfilment. Then we are an instrument expressing the Light.
